Best Platforms for Multi-Consultant Booking with Integrated Video & Payments

Platform Comparison

The table below compares top platforms that fulfill the requirements for OnlyiGaming.com. Each platform is evaluated on key features like multi-consultant support, profile listings, scheduling, payments, video calls, white-label branding, integration options, scalability, and pricing.

Platform	Multi-Consultant Management	Consultant Profiles Searchable	Scheduling & Booking	Payment Options (Cards/PayPal/Crypto)	Built-in Video Calls	White-Label Branding
MeetFox (Sendinblue)	Yes – Teams with individual accounts; can manage availability and even round-robin assignment [1] [2] .	Partially – each consultant has a personal booking page; no central searchable directory by default (manual listing or round-robin events needed).	Robust scheduling with calendar sync and automated reminders.	Credit/Debit via **Stripe** integration (no native PayPal or crypto) [3] . Invoices auto-generated. 5% fee on payments in free plan [4] .	Yes – integrated **browser-based** video conferencing for 1:1 (Pro plan) [5] [6] . Group calls/recording on Premium.	Yes – Custom logo/colors on Pro; full custom domain on Premium [7] . No MeetFox branding on highest tier.

Platform	Multi-Consultant Management	Consultant Profiles Searchable	Scheduling & Booking	Payment Options (Cards/ PayPal/ Crypto)	Built-in Video Calls	White-Label Branding
3veta	Yes – Supports teams; each consultant gets their own scheduling page. Team calendar sharing in Pro [13] . Also offers a **Marketplace Builder** for large multi-expert platforms [14] .	Yes – Can build a public marketplace where experts' profiles are listed (via their PaaS marketplace option) [14] . Out-of-the-box, booking pages are individual but can be aggregated via API.	Yes – Full appointment scheduling with calendar integrations [13] and booking pages for each consultant [15] .	Credit/Debit via **Stripe** (payments built-in; 5% platform fee on Starter, 0% on Pro) [16] . No native PayPal/ crypto (Stripe can handle cards).	Yes – **In-browser HD video** calls (1:1 and group) included [17] . Branded video meetings on all plans [18] .	Yes – Fully branded experience (custom logo, colors). Offers white-label video calls and API for 100% white-label integration [19] .
Wisebee	Yes – Designed for teams. Admin can manage each consultant's availability, services, and pricing [21] . Team members have individual calendars and client records.	Yes – Provides a **consultant directory**: set specialties/ departments and let clients *browse & search* consultants to find the right expert [22] . Can also auto-assign bookings to consultants [23] .	Yes – Online booking with custom intake forms, recurring session packages, calendar sync, reminders [24] [25] .	**Stripe** integration for cards (clients pay online at booking). No mention of PayPal or crypto (focus is on easy card payments). Funds go to business instantly [26] .	Yes – Built-in **1:1 video meetings** (unlimited duration) [27] . Includes screen-share, file sharing, etc., all in-browser (no downloads) [27] .	Yes – Add your logo for a branded booking and meeting experience [28] . Customer-facing UI is company-branded (Wisebee name is minimized).

Platform	Multi-Consultant Management	Consultant Profiles Searchable	Scheduling & Booking	Payment Options (Cards/ PayPal/ Crypto)	Built-in Video Calls	White-Label Branding
Consolto	Yes – Supports multiple consultants via "Expert Directory" feature [32] . You can create an attractive agent listing and manage staff in a shared back office. Each consultant ("agent") has their profile and can handle their own calls/ appointments.	Yes – **Expert Directory** allows showcasing all consultants with their profiles on your site, enabling clients to initiate chat, video, or booking with chosen experts [33] [34] .	Yes – Integrated 2-way appointment scheduling with booking links and widgets [35] . Calendar invites, reminders included.	**Stripe & PayPal** both integrated for client payments [36] . (Payments are handled in-platform – e.g. invoice clients and charge via Stripe/ PayPal.) No built-in crypto support.	Yes – **HD video conferencing** built-in (no external app needed). Supports 1x1 and group calls with screen-sharing [37] [38] . All runs in-browser (one-click from booking to video launch [38]).	Yes – **White-label**: console can be embedded "as part of your website, your brand" [39] . Can remove Consolto logos; custom styling (colors, etc.) is supported.

Platform	Multi-Consultant Management	Consultant Profiles Searchable	Scheduling & Booking	Payment Options (Cards/ PayPal/ Crypto)	Built-in Video Calls	White-Label Branding
Missed.com	Yes – Built for small businesses with multiple staff. "Workspaces" feature acts as a mini-CRM to organize *clients, staff, and appointments* with access controls [43] [44] . Supports teams and individual consultant logins.	Yes – Can create separate booking links for each consultant (each has a personalized booking page [45]). The platform itself doesn't yet offer a unified public directory UI, but profiles can be listed manually and linked.	Yes – Full appointment scheduling (one-off or recurring) with customizable availability, buffers, and automatic email reminders [46] [44] . Calendar integrations and mobile app available [47] .	**Stripe** integration for payments (secure card processing in-platform) [48] . Payments can be required at booking [49] . Invoices can be issued and tracked within the app [50] . (Crypto not supported; PayPal not mentioned.)	Yes – **Browser-based video calls** included (HD quality [51]). Missed started as a videoconferencing tool, so the video feature is robust [52] . Includes extras like multi-user whiteboard for collaboration [53] .	Yes – **White-label ready**. You can add your logo, colors, and essentially make the platform your own [54] . Missed is meant to be rebranded as your "own app" [55] with seamless integration into your site.

Platform	Multi-Consultant Management	Consultant Profiles Searchable	Scheduling & Booking	Payment Options (Cards/ PayPal/ Crypto)	Built-in Video Calls	White-Label Branding
Cal.com (Open Source)	Yes – Supports teams and even multi-vendor scenarios via its open scheduling infrastructure [60]. Organizations can create multiple user accounts (admins, consultants) and manage availability. Requires some setup if self-hosted.	Yes – Highly customizable. You can build a **custom frontend** or use Cal.com's UI to list consultants. (Cal.com is essentially a toolkit/API for scheduling; it doesn't provide a pre-built public directory out-of-the-box, but one can be implemented via their API or open-source code.)	Yes – Powerful scheduling with all standard features (calendar sync, buffers, reminders, etc.). Can define different event types per consultant.	**Stripe** integration for paid bookings [61] (collect payments before meetings). Supports all Stripe payment methods (cards, etc.). No native PayPal (unless using Stripe's alternatives) and no built-in crypto (except what Stripe or custom integrations allow).	Yes – **Cal Video** is a built-in WebRTC video solution [62] (supports 1–300 participants, recording, etc.). You can also integrate other video providers (Jitsi, Zoom, etc.) via plug-ins [63]. All can be launched from the browser with one link.	Yes – **100% white-label**. Cal.com is open-source, so you can host it on *your own domain/ servers* with full branding control [64]. Even the hosted version allows removing Cal.com branding.

Platform	Multi-Consultant Management	Consultant Profiles Searchable	Scheduling & Booking	Payment Options (Cards/ PayPal/ Crypto)	Built-in Video Calls	White-Label Branding	
Yo!Coach (Self-Hosted)	Yes – Built specifically for multi-consultant marketplaces (tutors, coaches, consultants). Admin panel to manage all consultant profiles, approvals, schedules, etc. Each consultant has their own dashboard and calendar.	Yes – **Comprehensive directory** functionality. It's a full marketplace software: you can list consultant profiles with bios, ratings, filters, etc. out-of-the-box [65] . Clients can search and browse by category or name.	Yes – Advanced scheduling system included (availability calendars, booking requests, recurring sessions, etc.) tailored for consulting/ tutoring needs. Also supports group sessions and course bookings.	**Multiple gateways**: Supports **Stripe, PayPal, bank, e-wallets** etc., with multi-currency [66] . Can be extended to accept crypto via API integration (not default, but you control the code). Payments can be set per hour, per package, or fixed projects. Secure payment processing is built-in [67] .	Yes – Comes with integrated **video conferencing module** (often via Zoom or a WebRTC API). Also features virtual whiteboard, screen share, recording – all embedded for users [68] . (Self-hosted means you could integrate any WebRTC service if needed for in-browser calls.)	Yes – **Fully white-label**. It's your platform running on your server/ domain. You can brand everything (logo, theme) as your own. No third-party branding since you license the software outright.	

Table Key: = fully supports; "Yes" = meets requirement; Partial/No = doesn't fully meet or requires custom solution.

Top Recommendations by Priority

- **Most Complete All-in-One: Consolto** is a standout for ticking all boxes in one package. It seamlessly combines scheduling, **in-app video calls, and payment collection** in a single flow [38] . Clients can **book, pay, and join the call all on your site** with no redirection [38] . It supports both **Stripe and PayPal** for payments [36] (covering major card and PayPal users), offers a branded widget for your

website, and even includes CRM features like chat and file transfer. Consolto is very comprehensive, making it ideal if you want a plug-and-play solution with minimal integration work.

- **Easiest to Integrate: MeetFox** and **Wisebee** are extremely easy to integrate into an existing site. MeetFox provides copy-paste embed options (iframe, widget, etc.) [8] and a hosted booking page, so you can get started quickly. It handles scheduling, built-in video, and payments (Stripe) all under one roof [71]. Wisebee similarly offers an embeddable booking form and was designed for small businesses to get online fast, with **no coding required** to add it to your site. Both have free trials or plans to test, making integration and onboarding straightforward. If you prefer not to self-host and want a quick setup, these are top choices.

- **Most White-Labeled Solution: Yo!Coach** (self-hosted) provides the highest degree of white-label control – the entire platform runs under your branding with **no third-party URLs or logos** visible. Since you host it, you can customize the branding and user experience completely. This is ideal if OnlyiGaming.com aims to present the service as a proprietary platform. For a SaaS option, **Missed.com** emphasizes white-label capabilities as well – you simply swap in your logo/colors and it **becomes your own app** [54] [55]. Missed.com's scheduling and video tools can be so tightly integrated that users won't see any external branding, fulfilling the no third-party branding requirement.

- **Most Scalable for Growth:** If you plan to scale to hundreds of consultants and high volume, **3veta** is built with scalability in mind – it literally markets itself for powering "your scalable marketplace, where experts meet clients" [14]. Their infrastructure and pricing model can handle large teams (with API and marketplace builder options for customization). **Cal.com** is another highly scalable choice due to its open-source nature – you won't be constrained by vendor pricing per user, and you can scale the system on your own servers to any number of consultants. Finally, **Yo!Coach** offers scalability from a business perspective: a one-time license for unlimited users means you can grow to hundreds of consultants without escalating software subscription costs (just add more server resources). It's a robust enterprise-ready solution if you anticipate very large scale and need full control.

Pricing Structures and Considerations

When choosing a platform, consider the pricing model as it affects scalability and cost:

- **MeetFox:** Free to start (with 5% fee on client payments) and affordable paid plans per consultant [4]. Good for small teams, but costs grow linearly with each added consultant ($10–35 per user per month). No PayPal support could be a drawback if your clients prefer that method.

- **3veta:** Low per-seat pricing (starts ~$3–$12 per user/month) [16] with no commission on higher tiers. This keeps costs predictable as you add consultants. It's cost-effective, though initial setup of custom marketplace features might require technical input (they do offer an API).

- **Wisebee:** Competitive per-user pricing (~£5.30/user/month) for the team version [31], and they offer a lot for that price (video, payments, etc.). This is a solid balance of features to cost. It's a young platform (free for solo use), and they appear eager to support growing teams.

- **Consolto:** Subscription is per "agent" (consultant) seat. At ~$8–$10 per user/month (with volume discounts) it's reasonable [42]. You get a rich feature set for the price. If you exceed their standard packages (up to 10 agents), you might need to negotiate enterprise pricing, but the included features (multiple payment options, white-label widget) add value that might save you integrating separate tools.

- **Missed.com:** Currently free – a big plus if you want to experiment or launch quickly with minimal budget [59]. In the future, they may move to a freemium model, which could introduce fees per user or per transaction. Keep an eye on their pricing changes; early adoption might grandfather some benefits. The "free" aspect, combined with its all-in-one nature, makes Missed very attractive for a pilot or MVP stage.

- **Cal.com:** Open source means the software is **free to use** and you won't pay per user. This is great for scaling economically – 100 consultants cost you the same as 10 in terms of licensing. However, you will incur costs for hosting, maintenance, and possibly developers to customize it. They do offer a hosted enterprise service if you prefer, but then pricing would be negotiated (likely per user or usage-based). Cal.com is a good choice if you have tech resources and want to avoid recurring SaaS fees.

- **Yo!Coach:** A one-time license (starting at ~$999) [70] gives lifetime access with no monthly fees. This can be cost-efficient long-term, especially if you scale to a large number of consultants (no per-user charges). The upfront cost is higher and you'll need hosting and technical setup, but you own the platform. It includes 1 year of support; after that, you might pay for upgrades or support contracts. This model suits a serious commitment to building your own branded marketplace with potentially hundreds of consultants – you invest once in the software and then your main ongoing costs are infrastructure and marketing, not user licenses.

Each of these platforms has reliable video and integrated payment capabilities, so the decision will come down to which aligns best with your **feature priorities, branding needs, technical resources, and budget**. For an all-in-one SaaS that you can embed quickly, options like **Consolto**, **Wisebee**, or **MeetFox** are excellent. If controlling the user experience and scaling without incremental fees is paramount, **open-source or self-hosted solutions (Cal.com or Yo!Coach)** will be the way to go, albeit with more setup effort. All the listed solutions are robust and have been used in professional consultation settings, so you can be confident in their ability to support OnlyiGaming.com as it grows.
